Sangoma s705 IP Phone

Large Color Display with Wi-Fi & Bluetooth Support

Designed to work with FreePBX and PBXact, Sangoma IP phones are so smart you can quickly and easily use them right out of the box.

The Sangoma s705 is a full feature set phone with 6 SIP accounts at a competitive price point. The s705 will automatically locate FreePBX / PBXact as soon as it's plugged into an Internet connection, and become automatically provisioned within seconds! – true Zero Touch Configuration.

The s705 features enhanced network connectivity with Power-over-Ethernet (PoE), Wi-Fi client and Bluetooth for true power and cable-free setup with your bluetooth headsets.

Zero Touch Provisioning

VoIP telephones can be complex to install, and manually configuring many different parameters and hundreds of extensions can take hours. When you buy and install your Sangoma IP phones, the redirection server automatically points the phone to the Sangoma FreePBX / PBXact for configuration.

Other vendors may have redirection servers, but they have to be programmed with details of the IP PBX. Only Sangoma can provide Zero Touch provisioning with FreePBX / PBXact.

EndPoint Manager Included

When using a Sangoma phone, EndPoint Manager software inside FreePBX / PBXact is automatically enabled. This lets your users control global settings, program their phone keys, map extensions, upload images, download new firmware, and much more.

Full Integration with PhoneApps

PhoneApps are a bundle of advanced applications (or features), which install directly onto your IP Phone, converting all your complicated features into easy-to-use visual applications, which you control, directly from the phone's display!
